EXPERIENCE

Investment Strategy Intern	Mar – May 2026
<i>Private & Wealth Banking, BBVA — Mexico City</i>	
- Conduct sector and industry research to support the team's weekly investment strategy publication distributed to private bankers. - Prepare client-facing presentations and pitch materials on asset allocation, market views, and investment recommendations for the advisory team. - Monitor model portfolios, benchmark indices and updates to the recommended investment universe using Bloomberg and FactSet. - Participate in daily market calls covering macroeconomic developments, financial markets, and key investment themes.	

PROJECTS & COMPETITIONS

CFA Research Challenge Participant	Aug – Nov 2024
<i>CFA Institute</i>	
- Built a full equity valuation of a publicly traded company using DCF, DDM, M&A comparables, and trading multiples to support a target price recommendation. - Co-authored an investment report including scenario analysis, risk assessment, industry dynamics, and financial projections. - Conducted peer benchmarking and industry analysis using Bloomberg and Capital IQ.	
Member, Business Case Competition Club	Jan – Apr 2025
<i>Universidad Panamericana</i>	
- Developed strategic recommendations through financial modeling, competitive analysis, and market research. - Delivered structured presentations translating business problems into actionable recommendations for panels of industry professionals.	

ADDITIONAL EDUCATION

World Economic Outlook & Global Strategy Programme	Jun – Jul 2026 (Upcoming)
<i>London School of Economics and Political Science (LSE), London</i>	
Upcoming summer programme focused on macroeconomics, geopolitics, national competitiveness, emerging markets, and global strategy.	
AI and Business Applications Course	Summer 2024
<i>Nanyang Technological University, Singapore</i>	
- Applied machine learning techniques, including regression analysis and clustering in R, to solve business cases and present AI-driven recommendations to a faculty panel. - Worked within an international cohort on data-driven business applications and strategic recommendations.
